

Abstract

(Oh god grant us from a you mercy and prepare for us guide for our affairs)

Thank for god who make the gratitude a key for his mercy and dragger for every grace and prayers and peace on the master of creations and best of his land and final prophets Mohammad the chosen and peace on guidance Imams and element of godliness ad trusted buttonhole ... and here after ..

For a certain reason several historical personalities had been non cared that had an active role in political events at that time, Had not got the interesting of scholars and researchers or universities in entire Iraq and had been kept forgotten and curtained by covers of forgetting and miscarry and ignorance but after the processes of change and blowing of new winds enriched with typical facts and indicated with modern directions in styles of teaching.

Where the Islamic – Arabians history across it's different ages was full of with several Arabian families that had an active role on stage of events and some families had succeeded to inheritance the position of cabinet that had been considered the most important position in ABASSEE succession after the Caliph , so in the end of the thirteenth Hijraa century some capable families appeared in writing and administration , and had inheritance the position of cabinet where almost this position has became concerned for only AL WAHAB and AL AL FORAT and AL MOKHALAD .

In fifth Hijraa century and during the period of SELJUK mastery on Iraq the family of AL ROZRAWARDY appeared and has succeeded on cabinet and has succeed in keeping the cabinet for long time for what it's men had administrative and political ability and among those who had not been mentioned by researchers till now is (ABO SHOJAA AL ROTHRAWARDEE 437 – 484 a.h.) and he is the sober modest and positive which has played a serious role in Arabian Islamic history across it's stage (late ABAASEE era) and has left great traces in events developments political , social , administrative and organizing but it was the period that ABO SHOJAA responsibility of authority and a minister for the ABAASEE caliph AL MOQTADEE is the most flourishing periods and progressing and openness due to what they carry's of thoughts , insisting and challenge proofed that he is capable for facing and able to success despite he lived in time of politics SULTANS like NEDHAAM AL MOLK and IBIN JAJAR.

Despite that this personality has left good historical trace XXXXXXX on experiments history of nations and has completed it's events and where extremely harmonic, twin and compatibility.

Due to my passion for this personality and events of that stage and because it has not cared by researchers as I had mentioned and I had chosen the research in this topic and I went on collecting references related with that stage which has mentioned this personality here and there inn papers and I was befall several of frustrating barriers that are related with that stage and less of what had been mentioned about the personality , the thing that had forced me to travel for any location that this reference would be mention and has cost me much of efforts especially lost security in provinces no good at that time.

But after depending on god and then the apposite instructions of supervising

masters Dr. JASIM YASEEN and Dr. AKLI GHANIM and their valuable notes and their supporting for me many difficulties had been facilitated along time of the research but their instructions were the light that has enlighten for me the route of research and has opened before me all closures and aspects I ask god to grant him the good in behalf of me , So I had determined my decision and has intended and leaned and started in writing after I had divided the research for preface and three chapters.

I had assigned the first chapter for ABI SHOJAA and his life, circumstances and confusions that had took place at that time especially in era of SELJUK mastery taking after that his relation and birth and his family life and finishing with his death.

However, the second chapter I had taken his administrative participations and his cabinet and how he managed to reach the cabinet and his ministerial works that I had mentioned them in two axis , the administrative works and social services but the third chapter I had mentioned his scientific participations taking his book named experiments of nations experiments as demonstration for historical events after that his style in authoring I mean his style in preface and depended sources from books and oral sources after that characters of book and finishing then third chapter by his poems .after that god enabled me to complete my research and has granted me his favors so I do not presume including all this stage and this researched personality in all sides and has influenced it , enriching it in searching and checking and documenting in total form (perfection for god only HM) but I had not kept any effort and had not ignored ant means and had not left any door provides me with information or benefiting me in my benefiting research I had knocked them , Please Sirs and fellows forgive me for any slip or forgetting and thank for god , god's of worlds.
